PROFILE SUMMARY

I'm a front-end engineer with 4 years of professional experience working on freelance and startup projects. I have a very deep understanding of how JavaScript works, the DOM, and web APIs. I pride myself in being skilled at component-based architecture having worked with React for 3 years I understand what it means to build, scalable applications, profiling for performance bottlenecks, optimization, and replicating designs with code while adhering to best practices.

SKILLS

Languages – Javascript, Typescript, PHP

Framework – React JS, Express, Node.JS, Angular, Enzyme, Jest, Supertest

Tools – Git, Webpack, Storybook, Prisma

Platforms – Docker, MacOS, AWS, CPANEL, Github, Azure, Digital Ocean, Firebase

EDUCATION

Federal University of technology, Minna   2014 – 2019

BACHELOR OF ELECTRIC AND COMPUTER ENGINEERING TECHNOLOGY

WORK EXPERIENCE

Swiftcore Technologies LTD – Frontend Engineer

Rubix Wallet – https://exchange.rubix.io

- Developed and maintained the admin portal for Rubix a blockchain-based wallet providing cross-border payments and settlement solutions.
- Utilized front-end technologies like React and Redux to build a complex web application that interacts with Rubix Network's backend infrastructure.
- Implemented cutting-edge technologies such as optical character recognition, localization support with several langauges, 2-factor authentication, and Charts.

React   Redux   Firebase   Testing-Library/React   Jest

BIF, Potifical mission societies – *https://app.missionsocieties.ca*

- Responsible for the development of a CRM portal to streamline operations and fundraising efforts for Pontifical Mission Societies.
- Migrated a legacy desktop application to an online portal and implemented innovative solutions to automate manual workflows and optimize the user experience.
- Integrated Azure DevOps into our workflow, facilitating seamless collaboration and ensuring the timely delivery of projects.

React   MUI   Azure DevOps   Enzyme   Jest

Vibewith (MVP) – *https://app.vibewith.co*

- Developed the UI components for a networking application using Next JS, ensuring a seamless and intuitive user experience.
- Implemented offline support and push notifications through a service worker, enhancing the application's accessibility and functionality.
- Integrated maps, geolocation, and geosearch features using Mapbox and Open street maps provider, providing users with a comprehensive and accurate location-based experience.

Next.JS   Redux   Azure DevOps   PWA   Testing-Library/React

Jest

SIDE PROJECTS

Interstellar Prime – *http://54.173.10.64:8000*   *https://github.com/Qliqsee/Interstellar-Prime*

A fullstack fantasy space exploration web application.

Docker   Express   MongoDB   AWS   Jest

Supertest

Market – *https://market-sqaure.netlify.app/*   *https://github.com/Qliqsee/market*

A Firebase Powered e-commerce web application for showcasing and selling products online with Stripe for payment.

Docker   Firebase   Testing-Library/React   Jest
